

FREE Energy Code Workshop

For Home Owners

Wednesday, September 28, 2011

“The House as a System”

Many home owners are unaware of what the energy code requires or what a properly insulated wall looks like, what the u-value of the fenestrations are, or if the HVAC system has been tested. The course is designed to give the home owners a basic understanding of what is required by the energy code, and to provide enough knowledge to ask good questions of the builder.

Instructor: Gil Rossmiller, Chief Building Official, Town of Parker, CO

2:00pm – 4:00 pm

Pueblo Association of Realtors (PAR)

2200 Kachina Dr.

Pueblo, CO 81008
